

## Pricing Deadlines and Forward Delivery Months

The Option Expiry Date will be used to roll unpriced basis first contracts. G3 does not permit rolling contracts over crop years; as such the last permissible roll for the 2018-19 crop year is June 21, 2019 over July futures for wheat, canola, and oat contracts, and August 23, 2019 over September futures for corn and soybean contracts.
